

MarketVector[™] Global Clean Energy Transition ESG Index

The MarketVector[™] Global Clean Energy Transition ESG Index (MVCET) tracks the performance of global companies involved in providing technologies and materials contributing to the global transition to clean energy. This is a modified market cap-weighted index that adheres to ESG criteria.

Key Features

Size and Liquidity Requirements

Full MCap of at least 150 mln USD. Three month average-daily-trading volume of at least 1 mln USD at a review and also at the previous two reviews. At least 250,000 shares traded per month over the last six months at a review and also at the previous two reviews.

Universe

Companies have to generate at least 50% of revenues either from technologies and services related to the production or storage of clean energy or electric vehicle charging infrastructure; or from global metals and rare earth elements that are used in technologies contributing to the proliferation of clean energy.

Diversification

Company weights are capped at 8%.

Review

Quarterly.
